

CALL FOR APPLICATIONS

Position: Senior Scaling Expert of the WASSD Program
Type of contract: International
Reference: 11/ET/2024
Location: Dakar (Senegal) with continental mobility
Openin date: 25/11/2024
Closing Date: 16/12/2024

Observations: Recruitment pending program launch

About CORAF and the Program

The West and Central Africa Council for Agricultural Research and Development (CORAF) was founded in 1987. CORAF (www.coraf.org) currently brings together the National Agricultural Research Systems (NARS) of 23 West and Central African countries: Benin, Burkina Faso, Cameroon, Cape Verde, Central African Republic, Chad, Congo, Côte d'Ivoire, Democratic Republic of Congo, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, Liberia, Mali, Mauritania, Niger, Nigeria, Sao Tome and Principe, Senegal, Sierra Leone and Togo. The vision of CORAF in its Strategic Plan 2018-2027 is a future where people and communities in West and Central Africa will achieve food and nutrition security and are prosperous. Its mission is to ensure sustainable improvement to the productivity, competitiveness, and markets of the agricultural system in WCA.

To achieve the goals of socio-economic development and people's well-being, African agriculture must significantly improve its productivity while maintaining the sustainability of diversified and quality agri-food systems.

High yield gap, estimated at 75% of potential yield and low average growth rate for most agricultural products (lower than the 6% target set by the Comprehensive African Agricultural Development Programme or CAADP) are worrying, given the substantial investments made in the sector over the last 10 to 15 years.

Limited availability of agricultural inputs, inadequate distribution networks in isolated communities, poor quality and counterfeit seeds, as well as high prices for certified seeds and inputs are ongoing challenges in West Africa and major barriers to agricultural productivity and growth. To address these shortcomings, donors and West African governments have been working through the Economic Community of West African States (ECOWAS) and other regional bodies to develop and operationalize consistent quality control procedures, strengthen seed systems and make trade in inputs easier, faster and cheaper.

ECOWAS has received financial support from USAID/West Africa for the development of a regional agricultural input strategy (RAIS). CORAF has developed on behalf of ECOWAS/CILSS/UEMOA the strategy that outlines an integrated approach to increase agricultural inputs, including seeds, crops, livestock and aquaculture. As part of the implementation of the strategy, CORAF designated as the technical secretariat has received funding for the implementation of the West Africa Seed Sector Development Programme (WASSD). The project aims to increase the availability and access to quality seeds, improve yields and food security, while strengthening the private sector and political environment.

The overall objective of the Seed Sector Development Programme in West Africa (WASSD) is to improve agricultural productivity through improved access for farmers to greater use of improved agricultural inputs and technologies provided by private sector companies in West-Africa, and a collaborative engagement with a multitude of regional and national organizations and associations.
